ORDER CORRECTING PURPOSE OF USE
AND PLACE OF USE

WHEREAS:

1. License 6391 was issued to J. R. Barron and was filed with County Recorder of Lassen on July 10, 1961 in Volume 168, Page 436.
2. License 6391 was subsequently assigned to Nanette Barron Martin and G. R. Barron on April 1, 1980.
3. A petition for change (to correct) the purpose of use and place of use has been filed with the State Water Resources Control Board and said Board has determined that good cause for such changes exist.
4. The corrections are needed to cover incidental uses at the upper and lower reservoirs located within Sections 9 and 10, T31N, R14E, MDB&M.
5. The Board has determined that said correction will not initiate a new right nor operate to the injury of any other lawful user of water and that good and sufficient cause has been shown for said corrections.
6. The license condition pertaining to the continuing authority of the Board does not conform the the current common law public trust doctrine as contained in Title 23, California Code of Regulations, Section 780(a).

NOW, THEREFORE, IT IS ORDERED THAT:

1. The purposes of use under this license be amended to read:

Stockwatering, Recreation, Wildlife Enhancement and Irrigation.

2. The place of use under this license be amended to read:

At the Upper Reservoir and Lower Reservoir sites located within E $\frac{1}{2}$ of Section 9 and 10, T31N, R14E, MDB&M; as shown on a map on file with the State Water Resources Control Board.

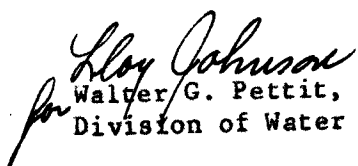

3. The existing continuing authority condition in License 6391 be amended to read:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
